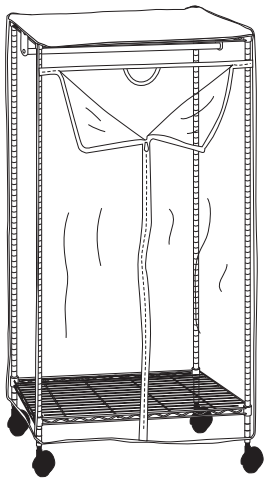
Upper pole

NOTE: part E has a plastic cap on one end.

F 4 ea
Lower pole

NOTE: part F has a small threaded hole on one end.

G 1 ea
Hanging bar

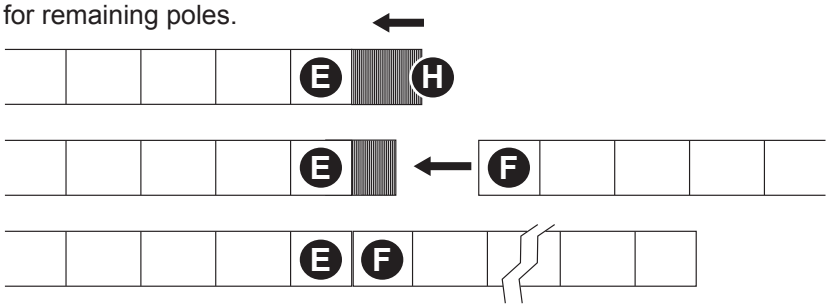


Assembly Time:
Less than 30 minutes.

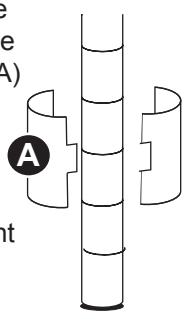
This product's intended use is for storing clothes.

Tools Needed:
Phillips screwdriver. A wrench is provided.

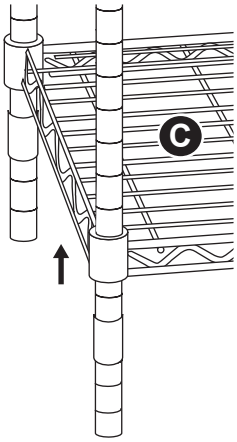
STEP 1. Connect upper pole (E) to lower pole (F) by threading connector (H) into open end of the chrome poles (there is a small ridge in the middle of part (H) to gauge the distance). Repeat step 1 for remaining poles.



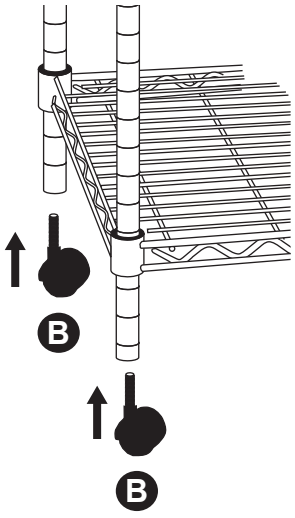
STEP 2. Starting at the bottom (the end with the small threaded hole, see diagram above), snap two sleeves (A) onto chrome poles at desired intervals. The sleeves are marked with a directional arrow to show proper placement. Use grooves on poles to ensure even shelf placement among the four poles. NOTE: Place only enough sleeves to assemble bottom shelf. This step will be repeated for top shelf.



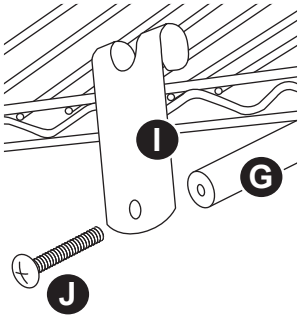
STEP 3. Slide poles with plastic cap on top through shelf corners until shelf (C) rests firmly on sleeves. Push or gently tap the shelf down at corners to level shelf. Repeat steps 2 and 3 for top shelf.



STEP 4. Determine which poles you wish to place the locking wheels. Screw wheels (B) into small threaded holes in the bottom of poles and adjust accordingly. If necessary, tighten with provided wrench (D)



STEP 5. Place two brackets (I) between the center wires on each end of top shelf. Place hanging bar (G) between brackets, aligning up holes. Assemble with screws (J)



STEP 6. Slide cover (K) over assembled closet frame. Be careful not to snag cover. Ease it down one corner at a time.

Note: Although your clothes closet can be assembled by one person, it is recommended that two people install the cover.
